Hey there! We found this little green guy hiding behind the Kennedy Space Center. Any idea what he's saying? | 'Aloh! Yos Bej. Sedeup emratacer, rop rovaf? Yotse la odal ed anu argednab euq ezid Anud.'

Flag

Submit

Correct

It is a reverse sentence in Spanish so I just gave chatgpt to reverse the words back and translate it

If we reverse each word in the given sentence, we get the following:

`Aloha! Soy Jeb. Despues rescatar, por favor? Estoy la dola de una bandera que dise Duna.`

This seems to be a mix of English and Spanish, and when translated, it becomes:

`Hello! I am Jeb. After rescue, please? I am the owner of a flag that says Duna.`

The flag appears to be related to "Duna," which might be a reference to **Dune**.

So, the likely flag format would be: **sillyCTF{Duna}**

Try that and let me know if it works!
