Are You Ready Mr. Krabs

387

Forensics

Easy

Wait, where have I heard those beeps before? Use all lowercase, no spaces, and wrap the flag in sillyCTF{}. For example, if the secret message is "go north", the flag would be sillyCTF{gonorth}

I have been given a mp3 file that contains spongebob laugh and a morse code going in the background

spongebob-ctf.mp3

379 KB • 2 minutes ago

I put it in the morse decoder to decode the morse code

International Morse Decoders

Audio DecoderAudio Decoder (Expert)Gaze Decoder

Get the Morse code work shop for a unique gift

Morse Decoder

This is an experimental tool for listening to, analysing and decoding [International Morse code](#). No information from the microphone is transmitted to the server, but the connection to the server is encrypted nonetheless.

If you cannot produce your own Morse code sounds then try using my [Morse code translator](#) to play or download some.

Alphabet to decode into

Latin

All these alphabets can be sent in Morse using standard timing. The "Latin" alphabet is e.g. "ABC".

Use the microphone:

Listen

Stop

Or analyse an audio file containing Morse code:

Upload

Play

Stop

Filename: "spongebob-ctf.mp3"
