Hidden Message-Board 106

Somewhere on this message-board is a hidden flag.
Nothing has worked so far but we have noticed a weird
comment in the HTML. Maybe it's a clue?

Correct

The challenge is asking us to find the hidden flags in the website

1. I inspect the website

2. I went to source and I saw a this in the javascript and I mean I know it was supposed to be a XSS or Cross-site scripting challenge but I was curious so I I tried to traverse to that file and....

```
"use strict";
module.exports = __webpack_require__.p + "static/media/flag.d93dd6a8616cc31d36db.txt";
```

3. hehe I accidentally got the flag
